7 August 1967

MEMORANDUM FOR: CIA Member, Critical Collection Problems Committee

SUBJECT : Classification of Major U. S. Intelligence Objectives

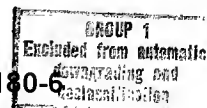

REFERENCES : A. CCPC-CIA-M-5/67, 30 Jun 67.

B. Amended Listing of Objectives Provided by you on 4 Aug 67.

Responding to referenced memorandum, and our telecon of 4 August, this Directorate's recommendations concerning the classification of Major U. S. Intelligence Objectives are forwarded as follows:

- 121 - Priority II should be applied to the USSR instead of Priority I according to the definitions given in para 4 of reference A. Also, this category should be more inclusive and read thus: Anti-missile defenses: anti-ballistic missiles, radars, or other systems or devices, including communications, filter and command center, identity techniques, and interceptors with weapons systems.
- 125 - Subject Category should be air defense systems which, besides missiles, includes radar communications, filter and command centers, identity techniques, and interceptors with their weapons systems.
- 170 - We suggest "Major Allies" be rated Priority III instead of Priority IV.

DDS&T-3068-67

SUBJECT: Classification of Major U. S. Intelligence Objectives

190 - The priorities for Chemical and Biological Warfare Capabilities and Intentions should be changed as follows:

USSR II
ComChina II
Other Communist Countries III
Major Non-Allies III
Other Specified Areas -

520 - "Communist China" should be rated Priority II rather than Priority III, especially for fissionable material.

600 - We believe that critically important scientific and technical developments in "Other Communist Countries" are important enough to be given a Priority III rating.
